

Double log bundler

- Double circular bucket 100cm
- 2 independent cylinders for every bundle
- 4 coils holders for a greater comfort

Hydraulic dump system HLB2 SPECIAL.

HLB2: more log bundles in less time.

The double log bundler HLB2 permits to prepare and to transport two log bundles at the same time, increasing the productivity.

The log bundler HLB2 is available with a standard unloading system with a third hydraulic point or in the SPECIAL version with integrated hydraulic unloading system.
