For details, see rotator catalog page 42

Progettata per la raccolta e la movimentazione di grandi quantità di ramaglie, sfalci e scarti legnosi destinati alla biotriturazione

Realizzata in materiali ad alta resistenza meccanica e all'usura, unisce leggerezza, robustezza e durata.

Designed for collecting and handling large quantities of branches, clippings and woody waste intended for chipping

Made from high-strength, wear-resistant materials, it combines light weight, robustness and durability.
